

CRT Spring Quarterly

NEWSLETTER

EVENTS GALORE

Certifications and Trainings

After winter break, we provided eligible members with the opportunity to take the NAR Level 2 Exam. We also hosted another launch, where more people were able to get their Level 1 certifications and do testing on other projects. This quarter, we also introduced members to more Think[box] trainings, giving CRT members greater capabilities for the rocket team and beyond.

Museum Trip

Taking a break from our CRT bay, some members took a field trip to the National Museum of the U.S. Air Force. We learned a great deal about aviation and rockery history, with some great team bonding along the way!

EVENTS

From this Quarter:

- Jan 31 – NAR Level 2 Testing
- Feb 24 – Launch
- Mar 2 – Museum Trip

Looking Ahead:

- April – Launches
- April 4 – Admitted Students Fair 1
- April 16 – CRT Executive Board Elections
- April 18 – Admitted Students Fair 2

IREC UPDATE

After design and manufacturing reviews for the rocket and payload, the team is hard at work manufacturing! Our composites group is running multiple tube tests towards a final custom airframe. Several members are contributing their machining skills and making good progress towards making this rocket a reality. With our Payload subteam in the manufacturing stage, multiple aspects are coming together nicely through work in machining, electronics, and our parafoil.
